# ADMINISTRATION REPORT

ON THE

## CENSUS OPERATIONS, NORTH-WEST FRONTIER PROVINCE, 1931

### CHAPTER I ENUMERATION

1. This part of the Census Report is published mainly for the guidance of the Provincial Superintendent at the next census.

Object of the  
Administration  
Report.

2. Captain Mallam took over charge of his duties as Superintendent, Census Operations, North-West Frontier Province, on the 1st of April 1930, and issued his first Circular of instructions to all Deputy Commissioners on the 12th April. In the middle of May owing to political disturbances he was deputed as Assistant Commissioner, Charsadda, in addition to his duties. He remained there until 6th September and during the period of deputation could hardly find any time to devote to the Census work. He was again deputed as Special Magistrate at Dera Ismail Khan from the 17th September to 9th November 1931, and as Additional District Magistrate, Peshawar, in January 1932. On the 8th April 1932, he was appointed to Kabul. From the 8th April to 27th July K. Sulian Muhammad Khan was in charge of operations. On the 28th July Mr. A. D. F. Dundas, I. C. S., was appointed to complete the writing of the report.

Opening  
remarks  
and Establish-  
ment.

In the beginning the office staff consisted of a Head Clerk deputed from the Revenue Commissioner's Office, one Jamadar and one Orderly. The Head Clerk was during the first year paid at the rate of Rs. 108 per mensem which was raised in the following year to Rs. 126 per mensem. One typist was employed on Rs. 50 per mensem with effect from the 1st of June 1930 and was discharged on the 31st May 1931. The above establishment was the only staff entertained for the Office of the Superintendent during the whole operations.

3. Most of the files and papers relating to Accounts and Printing of the Census Report, etc., preserved at the 1921 Census were not found and the Superintendent in consequence suffered considerable inconvenience and unnecessary labour. In most of the districts the Census Registers and Maps of 1921 had been preserved quite satisfactorily, but in the Peshawar District in spite of repeated requests from the Census office most of the valuable records had been destroyed. Owing to this the work of preparing Census Maps in each Sub-Division, the formation of Census Divisions etc., took much longer than would have been the case had the records of the previous Census been available.

The record of  
1921 Census.

4. In the first instance a permanent advance of Rs. 75 was sanctioned by the Government of India but in December 1930, this was enhanced to Rs. 200 subject to the condition that the enhanced limit would be reduced with the diminution of activities.

Permanent  
Advance.

5. The first thing to be done in connection with the Census was the drafting of the Provincial Census Code on the lines specified in the Imperial Census Code. It was preferred to issue Part I of the Provincial Code complete instead of by Chapters and it naturally took a longer time than it would have taken if issued by Chapters. In order to carry on the work a Circular Letter was issued in the beginning of April dealing with all sorts of preliminary stages of the operations. A complete Code in English was issued in the end of September 1930, and copies in vernacular were supplied to the officers concerned in the second week of November 1930. A separate Manual containing instructions for charge

Drafting and  
translation of  
forms and  
instructions.

Superintendents, Supervisors and Enumerators in English and Urdu was also issued. In addition to these printed publications a large number of important Circulars were sent to all Deputy Commissioners, Political Agents and District Census Officers.

The correspondence of the North-West Frontier Province Census Office being small in the initial stages, the Head Clerk was employed as Translator in addition to his clerical work. Most of the translations were read over to the Superintendent who insisted on the language used being as simple as possible, the words being those in common use. A doubtful translation, it was found, can be tested better by referring it to a few Patwaris than to linguistic experts.

The only suggestions, to be made for the improvement of the forms are noted below :—

- (a) All forms should be serially numbered.
- (b) Miscellaneous forms have hitherto been printed on papers of varying size, but the forms constituting the enumeration books are on paper of prescribed quality and dimensions which has to be obtained specially for the Census under the Census Commissioner's orders). It will save a great deal of trouble if every miscellaneous form is also abridged or spaced out so as to occupy an exact fraction of a sheet of the papers prescribed for the General Schedules.

No demands for vernacular forms in any language other than Urdu were received from any quarter.

#### Printing.

6. In 1931 the printing of all lithographed forms and instructions was entrusted to the Lakshmi Art Steam Press, Peshawar City, whilst the Circulars, Instructions and Report in English were printed by the Manager, Government Printing & Stationery Office, North-West Frontier Province, Peshawar.

Apart from any changes which may occur in the Province, the next Superintendent will probably be well advised to place his forms and Codes (Urdu) with the Lakshmi Art Steam Press, Peshawar, and all other work in English with the Government Press.

The contract which should be made with the private press must include special rates for all forms according to size and these rates should vary according as one or both sides are lithographed. Some provision should be made for rates for miscellaneous printing such as that required for the Codes, Manuals and correction slips and these should certainly not be based on a Government contract with another firm, nor should they be rates which can only be calculated by experts. The contract should be for such work as the Superintendent places with the firm and not for all his forms. He should be able at any time to transfer his work to another firm or to expedite its execution by allotting portions of it to other firms. The contract should state that rates for any special work can be fixed by agreement at less than the rates which would apply under the original contract. The printers should agree to keep all stones needed for forms set up until they receive an order from the Superintendent allowing them to deface or distribute them; they should also agree to set apart adequate and suitable storage room for blank paper and prepared forms in bulk. They should further agree to distribute forms by hand, post and rail, correctly counted (in bundles of 100 each tied with a string for convenience of counting) and securely packed, within twenty-four hours of receiving a distribution order. Superintendent should endeavour to get his forms printed well in advance; as far as possible the total requirements for each form should be printed off in one batch and the whole of the foreseen requirements for Enumeration, Slip Copying and Sorting should be finished some three weeks before the date for the final Census; however carefully the estimates are worked out it is probable that urgent indents for enumeration forms will come in during the last fortnight and that indents for additional slips will be received after slip-copying has been started.

#### Date of the Census.

7. The 1931 Census was held on the night of the 26th February 1931. The date as far as this Province was concerned proved suitable in all respects except that a slight difficulty was experienced in the Slip Copying work in the Dera Ismail Khan district owing to the fact that the Girdawari fell at about the same time.

## THE PRELIMINARY OPERATION.

8. In order to ensure the timely and simultaneous completion of each stage of the work a draft Census Calendar in the following form was worked out and circulated for guidance of the officers concerned :—

**Draft Census Calendar and Progress Report.**

*North-West Frontier Province Calendar, 1930-31.*

- |     |   |  |   |                 |                            |           |                                     |
|-----|---|--|---|-----------------|----------------------------|-----------|-------------------------------------|
| 1.  | Preparation of General Village and Town Registers.  | By the 1st of June 1930 at the latest.   |   |                 |                            |           |                                     |
| 2.  | Appointment of Charge Superintendents ...   | By the end of June 1930.   |   |                 |                            |           |                                     |
| 3.  | Preparation of Charge Register ...  | By the 15th July 1930, at the latest.  |   |                 |                            |           |                                     |
| 4.  | Abstracts of Charge Registers to reach Provincial Superintendent.   | By the 15th August 1930.   |   |                 |                            |           |                                     |
| 5.  | Report of the Charge Superintendents to District Census Officers regarding changes in the Census.   | Not later than the end of September.   |   |                 |                            |           |                                     |
| 6.  | Appointment of Supervisors and Enumerators  | By the end of September 1930.  |   |                 |                            |           |                                     |
| 7.  | Training of Charge Superintendents, Supervisors and Enumerators in House-numbering, and Delimitation of Blocks and Circles.                                     | By the 15th October.   |   |                 |                            |           |                                     |
| 8.  | House-numbering and preparation of House lists.   | 15th October to 15th November.   |   |                 |                            |           |                                     |
| 9.  | Circle and Block Maps ...   | By the 20th November.  |   |                 |                            |           |                                     |
| 10. | Submission to Provincial Superintendent of a revised abstract of the Charge Register together with the indent for household schedules, Enumeration Passes, etc. | Not later than the 15th November.  |   |                 |                            |           |                                     |
| 11. | Distribution of Forms ...   | December 1930.   |   |                 |                            |           |                                     |
| 12. | Training of Census Staff ...  | 1st half of October and whole of December 1930.  |   |                 |                            |           |                                     |
| 13. | Preliminary Enumeration   | <table border="0"> <tr> <td rowspan="2">{</td> <td>Rural areas ...</td> <td>2nd to 31st January 1931.</td> </tr> <tr> <td>Towns ...</td> <td>20th January to 15th February 1931.</td> </tr> </table> | { | Rural areas ... | 2nd to 31st January 1931.  | Towns ... | 20th January to 15th February 1931. |
| {   | Rural areas ...   | 2nd to 31st January 1931.  |   |                 |                            |           |                                     |
|     | Towns ...   | 20th January to 15th February 1931.  |   |                 |                            |           |                                     |
| 14. | Testing of the Preliminary Records.   | <table border="0"> <tr> <td rowspan="2">{</td> <td>Rural areas ...</td> <td>1st to 26th February 1931.</td> </tr> <tr> <td>Towns ...</td> <td>16th to 26th February 1931.</td> </tr> </table>        | { | Rural areas ... | 1st to 26th February 1931. | Towns ... | 16th to 26th February 1931.         |
| {   | Rural areas ...   | 1st to 26th February 1931.   |   |                 |                            |           |                                     |
|     | Towns ...   | 16th to 26th February 1931.  |   |                 |                            |           |                                     |
| 15. | Final Enumeration ...   | 26th February 1931 about 7 p. m. till midnight.  |   |                 |                            |           |                                     |
| 16. | Enumerator's Abstract ...   | 27th February 1931.  |   |                 |                            |           |                                     |
| 17. | Circle Summary ...  | 27th February 1931.  |   |                 |                            |           |                                     |
| 18. | Charge Summary ...  | 28th February 1931.  |   |                 |                            |           |                                     |
| 19. | Telegraphing of Provincial Totals ...   | As soon as possible.   |   |                 |                            |           |                                     |

To facilitate the watching of the progress of work they were also required

to submit their fortnightly progress reports in the form below :—

### CENSUS 1931.

Progress Report of the District/Agency for the fortnight ending 15th/31st 1930.

Name of Tahsil or town	Work completed to date	Work in hand	Date laid down in the Code for completion of work in hand	Probable date of completion of work in hand	Remarks by the district or Sub-Divisional Census Officer if work not up-to-date, and any other general remarks	Remarks by the Deputy Commissioner
------------------------------	------------------------------	--------------------	--	---	---	--

#### Formation of Census Divisions.

9. Elaborate instructions for the formation of Census Divisions are contained in Chapter III of the Provincial Code of Census Procedure, 1931 and there is no necessity for further elucidation save to emphasise that the Kanungo's circle should form the most convenient charge in rural areas.

Assistants may be appointed for exceptionally large charges or circles. Towns should be divided by Wards and Mohallas.

Charge Superintendents of rural and urban areas should all work under the District Census Officers who generally happens to be Revenue Extra Assistant Commissioner. Sub-Divisional Officers, in rural areas and the Secretary Municipal Committee in an urban area, are the persons best fitted for the work.

The nature of the Agency employed as Charge Superintendents, Supervisors and Enumerators, is shown in tabular form in Statements 1 and 1A appended to this Chapter

It is important to insist on a proper numbering of charges, circles, blocks and houses. Charges, to be numbered by districts, must include military charges, i. e., the Deputy Commissioner of each district must allot to each Military Station Commander one or more charge numbers and include them in his charge registers with all the civil charges. In many cases the Military charges were left out until the last moment. Circles should be numbered by Tahsils, Cantonments and Municipalities irrespective of charges. Numbering of blocks is by circles. Numbering of houses should be by villages, wards or Cantonments.

#### House numbering.

10. The instructions in Chapter VI of the Provincial Code were found sufficient and suitable.

#### The Prelimi- nary Records.

11. Chapter VII of the Provincial Code deals with the preliminary enumeration and the instructions given therein proved entirely suitable. The instructions regarding numbers of forms to be distributed and the system of keeping small local reserves worked admirably, and very few indents for extra forms were received from districts.

#### Inspection of Enumeration records.

12. The Superintendent visited every Tahsil and district headquarters once at least during the house numbering and again during the preliminary enumeration.

#### Use of household schedules.

13. In the smaller Cantonments and Civil Lines household schedules were dispensed with and regular English schedules used, but in all the larger European residential areas, such as Peshawar Cantonment, household schedules had to be used owing to a lack of trained enumerators who were literate in English.

#### Special Arrangements.

14. Special arrangements necessary for the enumeration of travellers on railways, travellers by boats, pilgrims, carters, touring officials, Police Stations, Jails, etc., are described in chapter IX and appendix II of the Provincial Code. These instructions were found sufficient and worked successfully in practice. The only criticism received for future use is that passenger tickets should be distributed only to the head of the Railway Administration and not direct to stations

15. The Census was synchronous throughout the Province except in certain areas, which were considered unsafe at night on account of the disturbed condition of the border, or where snow and long distances involved rendered it impossible for the Enumerators to visit all the houses in their blocks by night. The preliminary record for these tracts was checked either on the afternoon of the 26th or the morning of the 27th February. The areas so treated included the Kagan Valley in Hazara and certain outlying tracts in Bannu District.

Non-synchronous areas.

16. Arrangements were made for the preparation and despatch by wire of provisional totals from districts and agency headquarters. All Deputy Commissioners and Political Agents were requested to take necessary steps to have their totals telegraphed within a week of the taking of the Census. These totals were expected to be wired before 3rd March 1931. The dates of their actual receipt are shown below.

Provisional totals.

District or agency	Date of receipt of provisional totals.
Hazara ...	... 2nd March 1931.
Kohat... ..	... Ditto.
Bannu... ..	... Ditto.
Dera Ismail Khan ...	... Ditto.
Peshawar ...	... 3rd March 1931.
South Waziristan ...	... 28th February 1931
Kurram ...	... 1st March 1931.
North Waziristan ...	... 2nd March 1931.
Khyber ...	... 3rd March 1931.
Malakand ...	... 6th March 1931.

Note.—The latest date for the receipt of final totals was fixed the 3rd March 1931. On the 6th March 1931 the totals were telegraphed and tabular statement sent as well on the same day, which was also kept ready.

The delay in the receipt of totals from Malakand Agency was due to snow on the Lowarai Pass which prevented the passage of mails from Chitral.

17. The comparative accuracy of the provisional totals may be seen from the table below. They compare at first sight unfavourably with the figures for 1921 when the total error for the Province was +·031 per cent. instead of the figure of +·07 for the present year. The individual errors were, however, considerably larger in 1921, and to some extent cancelled one another out in the total. The absolute variations for Hazara and for Trans-frontier posts, for example, were 3,482 and 2,919 respectively in 1921 and 481 and 17 in the present census :—

Their Accuracy.

District or Agency	Provisional totals	Final totals	Variation of final from provisional figures	
			Absolute	Percentage
Hazara ...	669,636	670,117	+ 481	+ ·07
Peshawar ...	974,786	974,321	— 465	— ·05
Kohat ...	234,455	236,273	+ 1,818	+ ·8
Bannu ...	270,427	270,301	— 126	— ·05
Dera Ismail Khan ...	274,076	274,064	— 12	— ·004

Total Agency and Tribal Areas (post only) ...	46,468	46,451	— 17	— ·04
Total N.-W. F. P. ...	2,469,848	2,471,527	+ 1,679	+ ·07

# Industrial Census.

18. No industrial census was taken. The industrial development of the Province is still too small to justify any such census. An Industrial Survey is moreover available having been prepared by Mr. M. A. Rafee in 1928.

# Attitude of the public towards Census operations.

19. With the political situation in the North-West Frontier Province still incompletely restored after the unsettling events of 1930, it might be supposed that the atmosphere would have been inimical to an operation requiring as an essential factor for its success the co-operation of all classes of the population whatever their political convictions. News was indeed received that the All India Congress Committee had instructed its local bodies to boycott the Census. But no such boycott was for a moment attempted in this Province. On the contrary, all communities (and particularly the minority communities) in this Province were more than usually alive to the political significance of the present Census, and to the necessity for obtaining an accurate record of the strength of their communities.

# District Census Expenditure.

20. Rules regarding district census charges are given in Chapter IV of the Provincial Census Code. It may be seen from Statement III at the end of this Chapter that the total district expenditure has been very considerably reduced from that of 1921. The reduction from Rs. 2,759-5-2 to Rs. 772-7-6 was produced by reduction in almost every item, but particularly by the elimination of the charges for remuneration of census officers in Kohat and Bannu and by economy in house-numbering in Peshawar.

Outstanding good work in connection with Census operations in districts was rewarded by Sanads (Certificates). Three classes of sanad were adopted as on previous occasions, one printed in gold, one in red and one in black. The number of sanads for each district was fixed according to the population figures but, was modified according to the recommendations of Deputy Commissioners. The statement below shows the number actually issued both in the present census and in 1921 :—

District				Sanads issued		
				1st class	2nd class	3rd class
Hazara	...	1931	...	14	105	200
		1921	...	9	125	250
Peshawar	...	1931	...	27	187	505
		1921	...	26	141	501
Kohat	...	1931	...	9	33	107
		1921	...	11	42	84
Bannu	...	1931	...	9	56	106
		1921	...	8	45	100
Dera Ismail Khan	...	1931	...	10	54	103
		1921	...	9	52	104
Malakand Agency	...	1931	...	...	2	5
		1921	...	...	...	...
Khyber	...	1931	...	...	1	2
		1921	...	...	...	...

The Census Act lays down that census records are not open to inspection or admissible as evidence in a Court of Law. In the present census a note to this effect was printed on every cover and on every general or household schedule. In spite of this some Courts sent summonses to Census officials to present the census records as evidence. The summonses were returned unserved with a note explaining the situation. Lest any thing of the sort may happen in the next few years, enumeration books at headquarters have been destroyed as far as column 3 (name) before being sold, and Deputy Commissioners of districts have been asked to take similar action.

## CHAPTER II.

### SLIP COPYING.

#### Organization.

In the Censuses of 1911 and 1921 slip copying was done in the Central Office at Peshawar. Advantages and defects of this system are discussed in paragraph 1 of the Imperial Census Code, Part II, Chapter 2. On the present occasion slip copying was for the first time carried out in districts. In Kohat, Bannu and Hazara slip copying was done in the Tahsil under the supervision of Tahsildars. In Dera Ismail Khan it was done at district headquarters under the supervision of the Revenue Extra Assistant Commissioner. At the same time the Central Office was opened at Peshawar in which the slip copying for Peshawar District and trans-frontier posts was carried out. The opening of this Central Office was of advantage for the subsequent organization necessary for the work of sorting and compilation. The District Kanungo of Dera Ismail Khan and Tahsil Office Kanungos from Hazara, Bannu and Kohat were sent to the Census Office, Peshawar for training in slip copying on the 23rd February 1931, and returned taking with them the blank slips, forms, registers, etc., required in connection with copying operations on the following day. They were paid their actual expenses. These Kanungos then gave similar training at their own headquarters to the Patwaris and Kanungos who were to do the work or supervise it in Tahsils and districts.

#### Staff and accommodation.

Arrangements for the accommodation of copyists and supervisors who were Patwaris and Kanungos were made in Tahsils by the Tahsildars, and in Dera Ismail Khan by the Revenue Extra Assistant Commissioner. The Central Office establishment at Peshawar consisted of a Deputy Superintendent selected from among the ranks of Naib Tahsildars and Naib Tahsildar candidates at Rs. 180 per mensem, two Inspectors, one of whom was a field Kanungo from Peshawar District on Rs. 90 per mensem and the other a graduate on Rs. 80 per mensem; one Record Keeper on Rs. 80 with an Assistant on Rs. 50; an Accountant on Rs. 75 per mensem; five Kanungos as supervisors on Rs. 50 and two outsiders on the same rate; 52 Patwaris, mostly supplied from Peshawar District, who were given Rs. 7 per mensem as census allowance in addition to their grade pay, 25 others employed on similar pay according to their qualifications, and four English copyists at Rs. 35 per mensem. The menial staff attached to the office consisted of two chaprasis only; the sweeper, chowkidar and water-carrier of the Government Mehmankhana in which the slip copying establishment was accommodated were given small allowances according to the requirements of the different stages of work. When the office of the Superintendent was in the Victoria Memorial Hall a similar allowance was given to the menials of that building. A statement at the end of this report shows details of the establishment in each stage of the work with the period for which it was engaged. The revenue staff deputed for slip copying was required to attend the Census Office on the 6th March 1931, but it was not till a week later that all the Patwaris had arrived.

#### Material required before the receipt of the books from districts.

About 70 feet of wooden shelves two feet wide were fixed in one room to make a Record Room for the copying book forms, slips, etc. Each copyist was provided with a box of pigeon holes for his slips, a pencil, some thread and a sufficient number of blank slips of all kinds. One hundred and sixty-nine boxes containing 24 pigeon holes, six horizontally and four vertically, were required. Some difficulty was experienced in obtaining these in a hurry and in future it will be advisable to make all such arrangements as long as possible before-hand.

#### Instructions to staff.

The method of tabulation is to be found in Chapter I of paragraph 2 of the Provincial Code of Census Procedure. Instructions to copyists and supervisors are to be found in Chapter 2 of the same volume. Badami slips were used for Muslims, green for Hindus, red for Sikhs, blue for Christians and yellow for others. The symbols used for sex and civil condition are to be found in the

Provincial Code, Part II Chapter I Paragraph 2. The abbreviations used are to be found in the same chapter.

An Urdu translation of the Imperial Census Code, Part II Chapter II, was given to the supervising staff for guidance in checking copying work, and in filling in blank columns in the schedules wherever these might have been accidentally left blank by enumerators.

No special slips were devised for infirmities, but as in previous census practice the ordinary slips were used. The daily out-turn of these was less than 150 owing to the time occupied in searching the enumeration books.

The daily out-put fixed for copyists was the copying of 500 slips as in 1921. Gangs of 10 men under one supervisor and an assistant were formed. The method of calculating rewards and fines was to pay Re. 1 for every 500 extra slips copied in the course of a month. Copyists employed on the slips of rural areas were more easily able to earn rewards than those doing slip copying of towns and cantonments who found it difficult to reach the daily standard of 500 slips. Slip-copying started on the 12th March 1931 and finished in the Central Office on the 15th April 1931. A statement at the end of this chapter gives details of slip-copying offices in the districts and tahsil headquarters. The daily out-turn of slips did not reach the standard rate of 500 slips in out-offices since the copying was not done continuously by the whole staff. It was at first intended to pay rewards to the Revenue staff who worked in out offices to enable them to meet the extra expenses incurred by them for leaving their circles and working at headquarters, but when it was found that the staff had not worked up to the desired standard, halting and travelling allowances for the journeys to and from copying offices were paid on the basis of the time within which the work should have been finished at the standard rate of 500 slips a day.

Calculation  
of rewards  
and fines.

In the case of out-offices the duties of Record Keeper were performed by the office Kanungo. Field Kanungos and selected Patwaris worked as Supervisors and Assistant Supervisors. The checking of the work was done by Tahsildars at Tahsils and by the Revenue Extra Assistant Commissioner and District Kanungo in Dera Ismail Khan. In the Central Office it was under the direct charge of the Deputy Superintendent. Mistakes in the earlier stages were about one or two per cent. but soon decreased to two or three per mille. Supervisors and Assistant Supervisors began by checking every entry made by copyists, but afterwards checked from 5 to 20 per cent. of the entries according to the standard of the particular copyist. The Deputy Superintendent and the Inspectors checked the work of the Supervisors and Assistant Supervisors. Since the accuracy of the census tables and all subsequent work depends on the accuracy of the slip copying, the checking must be as thorough as possible. The staff employed on slip copying is one which is not generally in the habit of sitting in offices and is, therefore, anxious to be rid of the work as soon as possible and return to its own headquarters.

Supervision.

The slips sent to out offices were sufficient except in the case of Sikhs. Telegrams were received asking for more red slips for Sikhs, but the supply in stock in the Central Office also gave out, and since no more red paper could be found at short notice slips previously intended for Muslims had to be dyed red. The stock of Muslim and Hindu slips was sufficient, but it will be advisable in future to keep sheets of paper in stock for emergency printing for the smaller communities.

As a rule slips from slip-copying offices were received in good time. During the preparation of village tables and the making up of boxes some difficulty was experienced as in some cases totals by villages were not given in register A and in some cases many mistakes were detected in the totals that were given. Such errors and omissions are most disconcerting.

A special gang was organized under a supervisor to prepare village tables in accordance with paragraph 7 of the Imperial Code of Census, Part II, Chapter 3. These tables were prepared from register A and provided all material for Imperial tables numbers 1 to 5 and No. 16. The village registers were afterwards bound and sent to their respective districts and Tahsils for record. They are not printed but office copies of them are preserved in the Civil Secretariat along with other necessary census records.

Village tables.

## SORTING.

**Making up of boxes.**

After the slips have been received from copying offices and the work of slip-copying in the Central Office is complete, there is the intermediate stage, before sorting can be begun, of making up the boxes and counting the slips put into them. Detailed instructions for this are contained in the Imperial Code of Census, Chapter III paragraphs 5 and 6. The slips received and copied were in the charge of the Record Keeper, and for this reason the making-up of the boxes was entrusted to him under the immediate supervision of the Deputy Superintendent. As already noted, there were a great many mistakes in registers A as received from copying offices. This resulted in the difficulty that the slips when counted did not tally with the totals in the registers, and no sorting could be undertaken until the totals of the slips and the totals in the registers had been made to agree.

**Sorting staff.**

The copying-staff of the Central Office was not sufficient for the sorting operations of the whole Province, but was supplemented by revenue officials from each of the districts who had been employed on copying work in their own headquarters. These persons brought with them a local knowledge of castes and occupations, and were therefore of greater value than any who could have been employed casually on similar rates of pay. In this manner eight Patwaris were brought in from Hazara, five Patwaris and one Kanungo candidate, each from Bahnu and Kohat, and seven Patwaris and two Kanungo candidates from Dera Ismail Khan. They worked as Sorters and Supervisors from the 15th April 1931. The total number of Sorters was not less than 100 and not more than 110 at any one time.

**Procedure in sorting.**

The sorters were arranged in gangs of about 10 persons, the whole being under two Inspectors. Sorting began on the 18th April and was finished on the 31st May. The procedure observed was in all cases that prescribed in the Imperial Code of Census, Part II, Chapter III, paragraphs 8 to 39. Translations in Urdu were printed on the back of all the Sorter's tickets for all the tables for which sorting was required. Later instructions received in the form of circular letters etc. were explained verbally to the staff. Each sorter was given two boxes containing altogether from 2,000 to 35,000 slips. It was found by experience that the number was in some cases too large for the boxes provided, and that slips could not be taken in and out of the pigeon-holes without becoming twisted.

**Lessons learned in the course of sorting.**

It was found advisable that slips for males and females should be put in separate boxes. It would also probably prove more satisfactory if sorting were done by tahsils or districts instead of for the whole office at one time. As soon as the slips of one tahsil or district are ready, sorting for that area should be begun. The compilation section should also be started as soon as sorting is undertaken. In this way the irregularities revealed by the checking of the compilation staff can be quickly rectified, and the difficulties experienced in one table of a tahsil can be avoided in the same table of another tahsil which is slightly behind the first.

No Urdu translation of Chapter III of Part II of the Provincial Code of Census was printed, but such a translation would have been of value to sorters and supervisors since the instructions on the back of the tickets can not be full enough to cover all the points dealt with in the code.

The standard daily tasks for sorting main tables are given in paragraph 18 of Chapter III, and are based on recommendations and experience of the Superintendents of 1921. The following rates were fixed for the tables:—

Table No. VI	{ Rural	...	...	20,000
	{ Urban	...	...	15,000
" VII		...	...	4,000
" VIII		...	...	6,000
" IX		...	...	4,000
" X	{ Rural	...	...	4,000
	{ Town	...	...	3,000
" XI		...	...	4,000
" X	{ Males	...	...	9,000
	{ Females	...	...	15,000

Table No. X IV	{ Males	...	...	9,000
	{ Females	...	...	15,000
" XV-I		...	...	16,000
" XV-II		...	...	16,000
" XVII		...	...	4,000
" XIX		...	...	4,000

The sorters were required to work up to the task fixed for each table. Rewards and fines for sorters were worked out in the same way as in the case of copying. The time spent and required to finish the sorting of a table were calculated, and the difference of the time saved or extra spent was taken as reward or fine after deducting six hours as a day's working period. The task fixed was reasonable and it was difficult for a sorter to earn a reward unless he worked before or after office hours.

## COMPILATION AND TABULATION

Instructions for compilation and tabulation are to be found in Chapter IV of Part II of the Imperial Code of Census. The whole work of compilation from the checking and posting of sorter's tickets to the preparing of the final tables for the press was done by the Compilation Staff, under the immediate supervision of the Deputy Superintendent. The compilation office was divided into two sections viz. (1) that in which the tables were compiled and prepared for the press and (2) that in which the tables were checked independently of the compiling section. The subsidiary tables were prepared by a selected staff working with the Deputy Superintendent. The best English-knowing sorters were employed as Compilers and two or three Supervisors were also engaged during compilation and tabulation.

Staff.

The different stages of compilation were :—

- |            |   |  |
|------------|---|--|
| Section I  | { | (1) Checking of sorter's tickets.                    |
|            | { | (2) Compiling of tables.                             |
|            | { | (3) Preparing of tables in final form for the Press. |
| Section II | { | (4) Special checking.                                |
|            | { | (5) Printing.  |

Method of  
Compilation,  
tabulation and  
checking.

The work of the checking branch was to check the circle numbers and totals in the sorter's tickets, so as to ensure that all the tickets for each table had been received and that the totals were correct. These sorter's tickets were then checked by the special checking staff, who brought all the errors and irregularities to the notice of the Deputy Superintendent so that, if necessary, further investigation might be made. The compiling staff posted the sorter's tickets in the compilation registers according to the instructions given in the Code. The "final tables" branch then prepared the final tables from the compilation registers. The final tables were scrutinised by the special checking staff, who checked all the totals and applied the tests and cross references laid down by the Census Commissioner, for India in his Memo. No. 38-Comp., dated the 2nd July 1931. The Deputy Superintendent compared the final tables with those of 1921 and all striking changes were noted.

The final tables along with compilation registers were then submitted to the Superintendent for approval and orders. In the case of unexpected variations from the figures of 1921, a further enquiry was ordered. Fair copies were prepared for the press and for the Census Commissioner for India for approval. The proofs on receipts from the press were again checked by the Deputy Superintendent and the Superintendent. During the checking of the proofs it was found that second and third proofs were frequently required. Besides this it was also found that it was not sufficient to check only those figures in a second or third proof which had been corrected in the first proof. Figures which had been corrected in a previous proof were frequently found altered in a later proof, so that every figure in each proof had to be checked. Final orders for printing were given, when the tables had been finally approved by the Census Commissioner for India.

Preparation of  
final tables.

The preparation of the Occupation table is a lengthy and complicated process, and three compilers under a Supervisor were separately employed for

Special  
difficulty of  
certain tables.

the starting of the Compilation work, to prepare the classification sheets from the sorter's tickets, before taking in hand the actual compilation. The occupation tables were prepared by this staff.

The preparing of the language tables also requires special attention. The entries in the sorter's tickets before their being posted in the compilation registers should be classified carefully according to Sir George Grierson's scheme. The language classification made by the general public and the enumerators can not easily be made to correspond with Sir George Grierson's scheme. The compilation and preparation of the remaining tables requires no special comments; they are prepared according to the instructions laid down in the Code.

In addition to the Imperial, Provincial and Subsidiary tables, a great deal of material and statements are required for part I (the Report part) of the main volume which was collected and prepared by the Deputy Superintendent and one or two men who were retained on duty until the closing of the Census Office.

**Special  
statistical  
material for  
the Report.**

## STATEMENT I—COPYING OF SLIPS

Serial No.	District or State	Copying office	Number of slips	Number of copyists	Date of commencement	Date of completion	Average Daily output per head.
1	2	3	4	5	6	7	8
1	Hazara	Mansehra	208,660	41	3-3-31	18-3-31	410
2		Amb and Phulra	37,943	8	13-3-31	28-3-31	351
3		Abbottabad	253,779	51	5-3-31	20-3-31	389
4	Peshawar	Haripur	169,735	43	3-3-31	16-3-31	252

15		Kulachi	51,851	35	3-3-31	13-3-31	151

\* Including English slips.

## STATEMENT II—SORTING

Number of units sorted for table No.

Period	VI	VII	VIII	IX	X	XI	XII	XIII	XIV	XV	XV-II	XVII	XIX
1	2	3	4	5	6	7	8	9	10	11	12	13	14
Up to the end of April 1931	6	17	...	...	...	...	...	11	...	3	3	...	...
Up to the end of May 1931	12	1	17	5	18	17	5	7	17	14	14	17	7
Total	18	18	17	5	18	17	5	18	17	17	17	17	7

Note.—For tables Nos. IX, XII is the district for No. XIX districts, Peshawar City and Trans-Frontier Posts are units for sorting. In the case of all other tables, it is the Tank, Trans-Frontier Posts and Peshawar City i.e. (16 tahsils, one Trans-Frontier Posts and one Peshawar City).

# CHAPTER III

## THE COST OF THE CENSUS

Statement I and II appended to this chapter show respectively the actual cost of the Census Operations stage by stage, with total expenditure up to 31st December 1932, and an estimate of the probable charges for printing, binding and distribution of the Report.

The nett cost of the operations, after deducting Census receipts and recoveries made from Municipalities, is approximately Rs. 90,000. Comparison with the figures of 1921 is misleading, since on the present occasion the pay and Census allowance of the whole staff has been debited to the head Census while in 1921 only the allowances were debited to Census and pay was debited to the departments from which personnel was borrowed. If the pay of the Superintendent, the heaviest item of this nature, is excluded from the total as was done in 1921, the increase in expenditure is from Rs. 49,562 to Rs. 53,410, an increase of about eight per cent.; this compares favourably with the increase of 7.7 per cent. in the population, and gives the same figure as in 1921 of Rs. 21.6 expenditure per 1,000 of the population enumerated. In view of the fact that there has been a rise during the decade of some 25 per cent. in the average pay of all concerned, including those whose pay contributes in a large measure to printing charges, a much larger increase in total expenditure might have been expected.

The cost of enumeration was Rs. 756-4-0, of Superintendence, including the pay of the Superintendent, Rs. 52,366, of Abstraction and Compilation Rs. 22,925-5-5 and of Printing and Stationery charges Rs. 18,209-11-1. The amount recovered from Municipalities and Notified Areas rose from Rs. 2,549 3-6 in 1921 to Rs. 3,950-11-3 at the present Census. The increase is due both to an increase in population and to a rise in the rate of contribution. The contribution was calculated at the rate of Rs. 150, representing three months' salary of one tabulating clerk, per 1,000 of the population concerned.

## APPENDIX C.

## CASTES OR TRIBES RETURNED.

This appendix gives a complete list of Caste entries found in Column 8 (Caste) of the Census Schedules. Entries relating to Christians and others (Parsis, Buddhists and Jews) were excluded from Imperial Table XVII and have been omitted from this appendix as well. This appendix is divided into two parts :—

Part I.—Index to caste or tribe entries. In this part all the entries have been arranged alphabetically and the names of the caste under which each was classified in table XVII has been noted against it. For the sake of economy, only the larger and better-known sub-castes were sorted and included with the main castes, while the rest were sorted as "Others".

Part II.—Classified list of the names of castes or tribes. In this part are given all the castes and tribes under which the entries have been classed for the purposes of Table XVII. The castes are arranged alphabetically.

## PART I—INDEX TO CASTE OR TRIBE ENTRIES.

Caste or tribe returned in the Census Schedules	Main caste or tribe under which classed in Table XVII	Caste or tribe returned in the Census Schedules	Main caste or tribe under which classed in Table XVII
